Salt Lake City, Utah 84114

Dear Don:

RE: Withdrawal of Storage Water from
Funk's Lake (Sterling Irrigation Co.)

I have reviewed the plans for withdrawal of storage water from Funk's Lake by the Sterling Irrigation Company and it is my opinion that the proposal is workable.

Possibly, the State Engineer should compose a letter to the Sterling Irrigation Company to confirm their plan of withdrawal with a copy going to the Gunnison Irrigation Company, so that they may be able to be informed of what is taking place.

I presume you have retained the original copy of the proposal, therefore, I am keeping the copy you sent me for my files.

Yours very truly,

Earl

Earl M. Staker,

Dear Sir:

Here are the dates we are taking the water from the Lake Co. & the amount. We are taking one C.F. of water which will amount to two HC. ft. per day. our spot of 124 HC. ft. would be 31 HC. ft. where we are trading one to four.

The water was turned in our ditch on Aug. 10. as I told you on the phone & will be turned out Aug 26, 1967

Yours truly,
Clair Otterman
Sterling Irrigation Co.
